

USER STORIES

As a user, I want to be able to know what my group is.	Clusterization of addresses given numeric values.
As a user, I want to know the group to which a specific address or street number belongs.	Creation of a view where queries can be performed.

BACKLOG

1. Create an SQL database (i.e. if data shall always be tabular).
2. Create ingestion pipeline for later data processing.
3. Linking the script to the database to perform queries.
4. Uploading the script (i.e. cleaned to scalable instance infrastructure).
5. Create UI.
6. Link functionalities to the instance.
